My passion for data analytics combined with my prior knowledge of programming would make me a great addition to the team. As a graduate of Information Technology and Business Information Systems from Middlesex University and a current master's degree student at University of Derby, I identify as a meticulous, logical, and quantitative individual with a passion for both business and technical aspect of an organization. I thrive when I challenge entities to look at problems from a data-driven point of view to drive innovation in business processes and optimization of results. My previous works are embedded in the GitHub link above.

EXPERIENCE

MAR 2022 – JAN 2023

APTECH [ACADEMIC STAFF]
